

**Amendments to the Specification:**

Please replace the paragraph beginning on line 16 of page 8 with the following:

FIGURE 9 illustrates creating a pinned item in accordance with aspects of the invention. After a start block, the process 900 flows to block 910 where the user selects the item to pin. While the above examples illustrate pinning a contact, the item selected to pin may be any item on the device that may be distinguished from other items. For example, a user may pin a file or folder within the file system. The user may also pin a field within a file. For example, a user could pin the mobile telephone number field within a contact. The user could also pin an application. Another example would be pinning an email message. Flowing to block 920, the item is pinned. Pinning the item associates an importance with the item such that a user can easily find the pinned items.
